WORK EXPERIENCE

Scientific Researcher/Biologist

MARE/ARNET-UE | 2018 — 2023

MARE-UE is a center for scientific research and technological development and innovation that focuses on the study of aquatic, freshwater estuary, and marine ecosystems, aiming to develop policies and practices for the conservation and sustainability of resources and in support of governance.

- Over 8 years of experience conducting experimental research and data analysis to evaluate scientific hypotheses.
- Cleaning, analyze and manipulate large data sets using statistical software and programming languages to ensure data quality.
- Experience with data visualization and reporting using tools to create easily understood reports.
- Developed and maintained databases to organize and manage research data.
- Assisted in developing and implementing data-driven strategies to improve business operations.
- Collaborated with cross-functional teams to design and implement research projects.
- Collaborated with numerous large and small companies as a consultant, providing valuable insights and guidance.
